Appendix C

Non-Member Agreement

The **Consortium for HPC/AI/ML Ethernet** (the "Project") would like to receive input, contributions, suggestions and other feedback ("Contributions") on the specifications, documents, source code, data, and other artifacts being developed within its working groups (the "Materials"). By signing below, you (on behalf of yourself if you are an individual and your company if you are providing Contributions on behalf of the company) grant the Project under all applicable intellectual property rights owned or Controlled by you or your company a non-exclusive, non-transferable, worldwide, perpetual, irrevocable, royalty-free license to use, disclose, copy, publish, license, modify, sublicense or otherwise distribute and exploit Contributions you provide for the purpose of developing and promoting the Materials and in connection with any product that implements and complies with the Materials. You warrant to the best of your knowledge that you have rights to provide this Contributions, and if you are providing Contributions on behalf of a company, you warrant that you have the rights to provide Contributions on behalf of your company. You also acknowledge that the Project is not required to incorporate your Contributions into any version of the Materials. You further agree that you and your company will not disclose it or distribute drafts of the non-public Project Materials to third parties. Unless the parties agree otherwise or the Project Materials are made publicly available by the Project, this obligation of non-disclosure will expire five (5) years from the date the material was disclosed to you.

Source Code

Any source code you provide to the Project is subject to the Developer Certificate of Origin version 1.1, available at http://developercertificate.org/ and the license indicated in the Project's source repository for the Materials.

Dataset

Any data you provide to the Project is subject to the license agreement indicated in the Project's source repository for the Materials.
